

Why your **ANIMALS** *Need Chiropractic Too*

Dr. Jessica Thompson D.C.
Exodus Animal Chiropractic

Why would YOUR Animal need Chiropractic Care?

- **HEALTH ISSUES:** Animals, like humans, will experience musculoskeletal problems that can affect their mobility and overall health. Chiropractic care allows for restoration of mobility and nerve balance which creates better health.
- **PERFORMANCE:** Chiropractic care can also be beneficial for animals that participate in high-demand activities such as competitive sports, agility training, and working animals. By maintaining proper spinal alignment, animals achieve optimal physical performance and prevent injuries.
- **PREVENTION:** Animals, unlike humans tend to not let us know when they are in pain or having issues until it's significant. So regular care may prevent this and allow them a much better quality of life.

Are There Certain Animals That Need Regular Chiropractic Care?

YES!!!! These two are the most common

Horses

These are some of the most common conditions that benefit from chiropractic care, but are not the only reasons:

- Poor Performance
- Lameness
- Back Pain
- Equine Arthritis
- Behaviors and temperament Issues
- Preventive Care

Dogs

The most common conditions in dogs that chiropractic care can help with, including but not limited to:

- Musculoskeletal issues such as hip dysplasia, osteoarthritis, or intervertebral disc disease
- Neurological problems like paralysis or ataxia
- Gait abnormalities
- Digestive issues like constipation or diarrhea
- Respiratory problems
- Preventive Care

What other Animals can benefit from Chiropractic Care?

Of course Exodus Animal Chiropractic doesn't limit care to just horses and dogs. These animals and more also benefit from Chiropractic Care

- Cats
- Cows
- Goats

In general, any animal that has a spinal column or nervous system can receive chiropractic care.

Why Choose Exodus Animal Chiropractic?

- Dr. Jessica's unique approach to animal chiropractic not only uses traditional techniques that involve pressure from her hands or specialized instruments BUT advanced techniques including Applied Kinesiology with Muscle Testing to detect and restore proper alignment and function to the animal's whole being including spine, joints, muscles, and nerves. This allows for optimal neurological firing and balance and helps the animal heal quicker.

Is Animal Chiropractic safe and effective?

- **ABSOLUTELY!** Animal chiropractic is a safe and effective form of care for animals.
- **Dr. Jessica's unique adjustments are gentle and painless so animals respond very positively to her treatment.**
- **Moreover, she will customize the treatment plan to the specific needs and conditions of each animal ranging from daily to weekly to quarterly for for your peace of mind and your animal's highest quality of health.**

A person with blonde hair, wearing a black puffer jacket and blue jeans, is holding a dark-colored horse. The horse is wearing a purple and white patterned lead rope. The background is a wooden stable wall with a window on the left.

How long does an animal adjustment take?

Because of Dr. Jessica's unique approach.

Dogs ~ 1 hour

Horses ~ A little longer than an hour

How do you get your animal started?

Simple!!!
